

Claims

What is claimed is:

- 5 1. A magnetic jewelry system of magnets linked together by magnetic attraction in decorative therapeutic circular configurations worn as jewelry, the system comprising:
- a series of magnets each having a magnetic force of at least 6,000 gauss and each of the magnets comprising a core of sintered ceramic having a coating of metal and
- 10 having a form and an exterior finish adapted for use in magnetic jewelry, each of the magnets diametrically magnetized utilizing a north/south relationship with each of the magnets having a north field connected to a south field of an adjacent one of the magnets to link together with each of the magnets forming an individual magnetic link in a circular configuration adapted to be worn as a piece of magnetic jewelry having a
- 15 magnetic attraction between each of the adjacent magnets as the only interconnecting means;
- wherein the piece of magnetic jewelry creates a therapeutic magnetic field around a portion of a user wearing the piece of magnetic jewelry.
- 20 2. The system of claim 1 wherein each of the magnets has a shape selected from the list of shapes consisting of a cube, a cylinder, a rod, a sphere, and a rectangular block, and the shapes can be used together in a single piece of magnetic jewelry for a variety of decorative choices.

3. The system of claim 1 wherein the piece of magnetic jewelry is adapted for use as one of a list of pieces of jewelry consisting of a bracelet, a necklace, an anklet, and a ring.

5

4. The system of claim 1 wherein the finish comprises any of a variety of finishes selected from the list of finishes including silver, nickel, black epoxy, 24k electro-plated gold, platinum, and black nickel which may be intermixed in a piece of magnetic jewelry for a wide variety of finish looks which can be worn together in

10 different combinations.
